Feedback

Grade for assignment	B
Graded on	Monday, 25 April 2016, 11:42 AM
Graded by	 Ioseff Griffith
Feedback comments	 A1: Grade: B Exercise 1 (IntCollection) - Good job!

Exercise 2 (Ferry)

- It seems unnecessary for Passengers to have a count when a Passenger will always just be one person
- Rather than using all the setters in the vehicle classes, you could instead make a constructor that takes all those parameters in the superclass and just pass them into it like that:

```
public Vehicle(double size, int maxPassengers, int fee, ...)
```

and then in inherited classes:

```
super(SIZE, PRICE, ..., ..., nrOfPassengers);
```

Exercise 3 (Sum)

- This isn't quite the method we intended for you to use, but it is quite close.
- In reality, a recursive sum will not be more efficient than a for loop so using recursion is probably not the best option!

Exercise 4 (PrintJava)

- Good job!

Exercise 5 (Pascal)

- Good job!

Exercise 6 (LanguageTool)

- Good job!

Exercise 7 (OneTwoThree)

- Good job, though the white line at the bottom is not ideal.

Exercise 8 (RandomPanel)

- Good job!

Exercise 9 (ColorDisplay)

- Good job!

Exercise 10 (JavaFX-LanguageTool)

- Good work overall, though we would have liked you to use some aspect of ControlsFX.

Overall: Graded

- Good job overall, just some minor improvements needed in a few places!
